- Built-in UTP
- BNC video output
- Flickerless Control
- Lower cabling costs, especially in longer runs
- Easily terminated
- Transmit video up to 1,000 feet
- Easier installation of longer cable runs

Description

The SMS 631UTP-B (Std-Res) and 631UPT-BH (Hi-Res) are high quality 1/3" colour CCTV cameras designed for use indoors or outdoors (housing required outdoors). The SMS 631UTP-B/BH cameras feature a flickerless control that stabilizes the wide and intense range of colour from sources such as fluorescent tubes and adjusts the color, gain, electronic shutter control and white tracking balance to produce a good quality colour picture.

With built-in UTP and BNC video outputs, the SMS 631UTP-B/BH cameras can transmit video up to 1,000 feet using UTP cable and the supplied passive balun or using standard CCTV Coax cable. Both outputs may be used simultaneously offering an option to run a video feed to a secondary monitor without losing signal strength or quality.
