- Dual Power DC12V/AC24V
- Enhanced Wide Dynamic Range Function (400X WDR)
- 48 Motion Detection Zones
- Super Digital Noise Reduction (SDNR) increased the S/N ratio to 60db

Description

A high resolution, long body, colour CCTV camera, featuring "On Screen Display" controls, wide dynamic range, anti-smearing and frame integration. Frame integration allows the light sensitivity to be turned up to provide a minimum illumination range from 0.05 Lux down to an amazing 0.001 Lux in colour. Wide Dynamic Range allows detail in both bright areas and dark areas in the same field of view to be resolved. Anti-smearing allows details to be seen against a very bright background.

Recommended Use: Indoors or outdoors (requires housing), where colour video is required at low illumination levels and/or when detail is required in bright and dark areas simultaneously or where details need to be resolved against a very bright background. OSD makes auto-iris and digital zoom control more flexible.
