Description

When used in combination, the interface adapter and microphone(s) provide an easy-to-use, excellent quality audio recording solution for digital video surveillance systems. The Interface Adapter provides power and load balancing for 1-8 microphones and provides an RCA connector for each audio output with unbalanced line level inputs. The standard flush mount omni-directional microphone has a 25' range in all directions and a selectable on/off treble boost circuit to enhance recordings.

Caution: It is the responsibility of the installation company and end user to comply with privacy laws regarding the use of audio surveillance equipment. If you are unfamiliar with these laws, consult a qualified attorney. In most cases, posting the provided warning label in plain view is all that is required.
